INTEGRATED SOLUTIONS

WORK STATION

The work station including the application WinOperate provides extensive checking, controlling, administering and reporting functions. The clear, easy-to-operate user interface can be adapted to various requirements.

For example, commercial clerks can simply and conveniently access business data from their offices and technicians can access relevant operating data and technical protocols.

- High quality PC with Intel® Pentium® processor 4, 1 GB RAM
- Software licence MS Windows XP Professional
- Communication with the data base server DBS via Ethernet
- Connection of several work stations to an DBS is possible
- Remote maintenance via ISDN modem or VPN without negative effects on the current operation
